```
# .cshrc v. 2.1 Executed by csh for each process.
# There is now a global .cshrc, so anything placed here
# is for your local account only. You may override global parameters.
# If you want to add a directory to your path type something like:
#         setenv PATH ${PATH}:additional-path:additional-path

setenv QUEUE pod1          #define default printer for dlpr
setenv EDITOR "pico -t"   #define default editor
setenv PRINTER pod1        #define default printer for lpr
setenv WINDOW_MGR twm      #define default window manager

setenv CLASSPATH
.:/opt/local/oracle/product/11.1.0/jdbc/lib/ojdbc5.jar:/opt/local/oracle/product/11.1.0/jlib
/orai18n.jar:/opt/local/oracle/product/11.1.0/bin/sqlldr

setenv ORACLE_HOME /local/opt/oracle/product/11.2.0/instantclient_11_2
setenv TNS_ADMIN /local/opt/oracle/product/11.2.0/instantclient_11_2
setenv LD_LIBRARY_PATH /local/opt/oracle/product/11.2.0/instantclient_11_2
setenv PATH {$PATH}:/local/opt/oracle/product/11.2.0/instantclient_11_2
```
